

# 43 YEARS

# OVER 56,000,000

# LIVES LOST LOST LOST LOST

*So small ... so complete ... so precious ...  
so worth defending.*

*"Indeed, I tremble for my country when I reflect that God is just."*

— Thomas Jefferson, 1784

**J**EFFERSON was speaking of slavery which was commonly practiced and eventually held by the Supreme Court of the United States in the Dred Scott decision to be constitutionally protected. Today, our nation endures the killing of unborn children. On January 22, 1973, the Supreme Court of the United States in Roe vs. Wade, gave doctors a license to kill unborn children. Like the Dred Scott decision, Roe is BAD LAW. About one million abortions will be performed this year, the vast majority simply for reasons of convenience.

The attack on the unborn continues by:

- Huge government subsidies of Planned Parenthood, the leading abortion provider, which was recently filmed selling body parts of unborn children;
- Forcing individuals, employers, and insurance companies to purchase or provide "health insurance" for contraceptives which can cause abortions; and violations of religious liberty by the Obama Mandate;
- Licensing of RU 486 (the "abortion pill"), and methotrexate, a cancer drug now used to kill the unborn;
- Proposed use of taxpayers' money to fund abortions;
- "Web cam" abortions where the doctor doesn't even physically examine the mother;
- "Sex selection" abortions;
- Opposition to parental notice; and
- Embryonic stem cell experimentation with taxpayers' money.
